## Metro Central region: Inner West, SE Sydney and Northern Sydney Network Areas

Cultural diversity: A relatively high percentage of the population of the Region have a language background other than English, with the highest proportion in Inner West Network Area, and relatively fewer in SE Sydney and Northern Sydney Networks. The region has a population of just over 2 million people, and almost 570,000 people or $28 \%$ speak a language other than English at home. 125,000 people arrived from overseas and settled in the region over the 5 years from 2006 to 2011, with most being from non-English speaking countries, meaning that the proportion of people speaking another language is increasing. Most significantly, $47 \%$ of children in public schools have a language background other than English ( $68 \%$ in Inner West Network Area). This indicates that for the purposes of planning services for children and families, a relatively high proportion of families in the region are of non-English speaking backgrounds. The schools data does not include smaller communities, but is a good indicator of cultural diversity.

Larger communities: The largest communities in Metro Central Region are Chinese (mainly speaking Mandarin and Cantonese), the established Greek, Italian, Spanish-speaking and Macedonian communities, Arabic-speaking (from Lebanon, Egypt and other middle-Eastern countries), people of Korean, Vietnamese and Indonesian backgrounds, and from the Indian subcontinent (Hindi, Nepalese, Bengali and Tamil speakers). There are also significant numbers of Japanese and Persian speakers (especially in Northern Sydney), Russian (SE Sydney) and Portuguese (Inner West). In addition there are many smaller migrant and refugee communities in the region.

Refugees: Metro Central Region is home to some significant refugee communities, which tend to have high levels of disadvantage and need for child and family services. Many of the Arabic community are refugees from Lebanon and other countries, including a significant Sunni Muslim community in Canterbury LGA and a Shia Muslim community in the St George LGAs (settled near particular mosques). The established Vietnamese community in Inner West Area also arrived in Australia predominantly as refugees. Refugees from Sudan and other African countries are settling in the Inner West, particularly Canterbury LGA. Persian speakers continue to settle with their established community in Northern Sydney, and many of these people are from religious minorities that have been persecuted in Iran. There is also an established Armenian refugee community in Northern Sydney. Many Tamils arriving from Sri Lanka (Inner West) are refugees, or arrive as skilled migrants but are leaving a fear of persecution. People arriving from Nepal (Inner West and SE Sydney) tend to arrive as students or skilled migrants rather than as refugees, however they are migrating from a country which is experiencing upheaval. In Northern Sydney, particularly Warringah LGA, there is a small community of Tibetan refugees.
Growing communities:
China is the largest country of origin for new migrants to the Region, followed by the United Kingdom, Indian sub-continent (India, Bangladesh, Nepal) and Korea. Many people from these communities arrive as skilled migrants, with education and work qualifications, or as students. Other significant growing communities are from Indonesia and the Philippines. Also, there are small but increasing numbers from African countries.

## Inner West Network Area

Ashfield, Burwood, Canada Bay, Canterbury, Leichhardt, Marrickville and Strathfield LGAs
Cultural diversity: A high percentage of the Inner West Network Area population is made up of people of non-English speaking background, with the highest numbers in Canterbury, Burwood and Strathfield LGAs. Of the 418,000 residents of the Inner West Area, 184,000 or 44\% speak a language other than English at home, 31,000 new residents have arrived from overseas in the 5 years to 2011, and $68 \%$ of children enrolled in public schools have a language background other than English ( $87 \%$ in Burwood LGA, and 85\% in Canterbury LGA). There are many large and small migrant and refugee communities in the Network Area.

Larger communities: The largest communities in the Inner West are Chinese (speaking mainly Cantonese and Mandarin), Arabic (the largest language in total, spoken by communities from Lebanon, Egypt, Iraq and several other countries), Greek, Italian, Vietnamese and Korean. There are also significant Spanish-speaking, Portuguese, Hindi, Tamil and Indonesian communities. Arabic-speaking and Vietnamese communities as a group have relatively high need for family and childrens services, and the Korean community has a medium level need. The other larger communities do not have above-average need. There are also Samoan and Tongan families in Canterbury and other LGAs, which have high service needs.

Refugees: The Arabic-speaking communities, with the largest numbers in Canterbury LGA, have significant numbers who are refugees and their families, and have high levels of service needs. The Vietnamese community is also predominantly refugee in origin, although they are now a quite settled community. There are also small but growing new refugee communities from Sudan and other African countries, particularly in Canterbury and Marrickville LGAs, and these refugee groups have high service needs. The Tamil community from Sri Lanka, most prominent in Strathfield and Burwood LGAs, may arrive as refugees or skilled migrants, where the migrants may also be leaving a situation where they fear persecution.

Growing communities: The fastest growing community from migration is from China, followed by the Indian sub-continent (India, Bangladesh, Nepal and Sri Lanka), and Korea. There are significant new arrivals from Vietnam, Indonesia and the Philippines, and smaller but high need communities emerging from Sudan and other African countries. The Greek, Italian, Spanish and Portuguese-speaking communities are now established and numbers are not growing greatly from migration.

## SE Sydney Network Area

## Botany, Hurstville, Kogarah, Randwick, Rockdale, Sutherland, Sydney, Waverley \& Woollahra LGAs

Cultural diversity: The proportion of non-English speaking background people in South East Sydney network area is higher than the NSW average, with the highest proportions in Rockdale, Kogarah, Hurstville and Botany LGAs. 27\% of people in SE Sydney Area speak a language other than English at home, compared to $21 \%$ for the whole of NSW, and 51,000 people arrived in the area from overseas in the five years to January 2011, mainly from non-English speaking countries. $47 \%$ of children enrolled in public schools in the area have a language background other than English ( $80 \%$ in Rockdale LGA, and over 70\% in Hurstville and Kogarah LGAs).

Larger communities: The largest communities in South East Sydney are Chinese (mainly Cantonese and Mandarin speaking), Arabic speaking (largely from Lebanon, Egypt and Iraq, with many settled in Rockdale LGA, plus Hurstville and Kogarah LGAs) and Greek. There are also substantial numbers from the established Macedonian (largely in Rockdale LGA), Spanish-speaking and Italian communities, plus Indonesian (in Randwick, Sydney and Botany LGAs) and Russian (Waverly, Woollahra, Sydney and Randwick LGAs). There are also significant communities from the Indian sub-continent (mainly from India, Bangladesh and Nepal). People from Hungary are mainly in Waverley and Woollahra LGAs.

Refugees: Many of the Arabic-speaking community, largest in Rockdale LGA, arrived as refugees or through family migration linked to refugees. The majority arrived from Lebanon and many in this community have links with a Shia Mosque in Arncliffe (Rockdale LGA). There are a few new arrivals from Iraq. Many of the now settled Spanish-speaking community arrived originally as refugees from South American countries from the 1970's, with largest numbers from Chile, Uruguay and Argentina (there was previously a Migrant Hostel in Botany LGA). Many of the Vietnamese community, also quite settled, arrived as refugees in the 1970's and 1980's, while people arrived from Hungary as refugees in the 1950s and 1960s. Nepalese are currently arriving mainly as skilled migrants and students, but many are leaving their country in part due to recent unrest. Refugee communities tend to have relative high levels of need, due to their experiences and disruption before arrival in Australia.

Growing communities: The largest numbers of new migrants to the SE Sydney Network Area are arriving from China, the United Kingdom and Ireland, the Indian subcontinent (India, Bangladesh and Nepal) and Indonesia. The majority arriving from these countries are arriving as educated or skilled migrants and their families, or as students. There are also significant arrivals from Thailand, the Philippines and Korea. There are few new refugee arrivals, although there is some family migration from Lebanon and a few arrivals from Iraq.

## North Sydney Network Area

Hornsby, Hunters Hill, Kuringai, Lane Cove, Many, Mosman, North Sydney, Pittwater, Ryde, Warringah \& Willoughby LGAs
Cultural diversity: North Sydney Network Area is reasonably culturally diverse, with 156,000 people or 20\% of the population speaking a language other than English at home, compared to $21 \%$ for the whole of NSW. 42,000 people arrived from overseas and settled in the area in the 5 years to 2011, and $37 \%$ of children in public schools are from a language background other than English ( $61 \%$ in Ryde, $57 \%$ in North Sydney and $53 \%$ in Willoughby LGA). There are many large and smaller migrant communities in the Network Area.

Larger communities: The largest community in Northern Area is the ethnic Chinese (speaking mainly Cantonese and Mandarin, from China and South East Asian countries). Other large communities are Korean (with many in Hornsby, Kuringai, Ryde and Willoughby LGAs) and the established Italian-speaking population. There are also significant numbers of people who speak Japanese (especially Willoughby and North Sydney LGAs), Arabic, Greek, German, and Spanish. There are also people from the Indian subcontinent (mainly speaking Hindi, and also Tamil and Sinhalese). There is an established Persian-speaking population, and people from the former Yugoslavia, speaking mainly Serbian and Croatian.

Refugees: The Persian-speaking community, living mainly in Hornsby, Kuringai, Ryde and Willoghby LGAs, migrated or fled from Iran from the 1970s onwards, with a number of these being members of religious minority groups who suffered persecution in that country. There is a Baha'i Temple at Ingleside (Pittwater LGA). There is also a smaller established Armenian refugee population, mainly in the Hornsby and Willoughby LGAs. The Tamil-speaking community, largely from Sri Lanka and settling in Hornsby, Ryde and North Sydney, are arriving as skilled migrants as well as refugees. The South African community, in Kuringai, Hornsby, and Warringah LGAs, arrived mainly as skilled migrants or sponsored by family, but some may feel they were compelled to migrate. A small number of Tibetan refugees have recently arrived in Warringah LGA.

Growing communities: The largest number of new migrants to North Sydney Area are arriving from China and the United Kingdom, with significant numbers also settling from India, Korea, South Africa, the Philippines, Japan and Malaysia. Most of these new migrants are skilled and educated, and the majority speak a language other than English. There are significant numbers of new refugees and migrants arriving from Iran, and a smaller number of Tamil refugees and migrants from Sri Lanka. People from Brazil are migrating to Manly and Warringah.
